

Getting to know Coordinates

Part 1 - Coordinates

Start this activity using the [Peabody test](#).

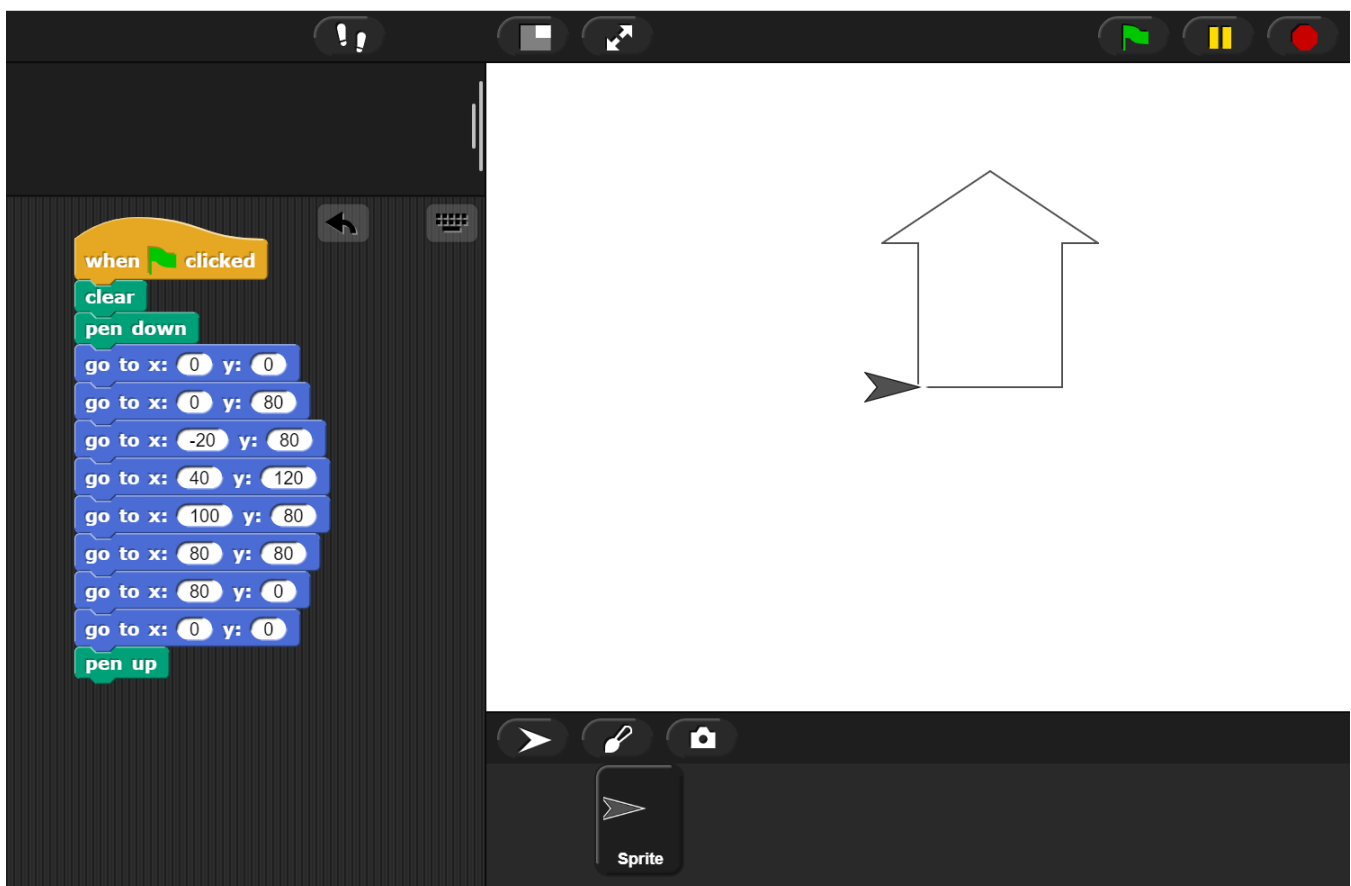

- Open the link above.
- Click on Peabody to start the test.
- Answer his question in the textbox.
- You should answer at least 10 of his questions.

Part 2 - Plot a drawing using a template

Using the [template](#) from the classroom activity, create a drawing that has at least 10 coordinates. Save the drawing in Snap! and submit the URL to your teacher.

- Reminder: Don't forget to log into Snap!

Here is an example with 8 coordinates:

Snap coordinate example

Grading scheme/rubric

Lab 0.5 criteria	Points
